Flyer Cleaning Machine

Fascination

- Machine operates by compressed air only & no electricity consumption.
- Completely dry cleaning process of flyers by the application of fine grit aloxite powder.
- Blasting & sucking processes are accurately done by blast nozzle & suction nozzles respectively.
- After thorough cleaning of inner passage of flyer, aloxite powder moves towards the filtering system & gets ready for next operation thus due to recycling of aloxite powder, it ensures 100% economical process.
